

CARBONCAPS™20

Unbreakable microcapsules loaded with high purity grade carbon black, designed to provide safe and intense black shade
Clinically assessed and ophthalmologically approved

CarbonCaps™20

Suitable for	Mascara, eyeliner, eye shadows, liquid and powder based formulations
Appearance	Black powder
Payload	Pigment ~ 90%
Color	
Particle size	Unbreakable and transparent 20µm microcapsules
Solubility	Dispersible
Storage	Room temp
INCI Name	CI 77266 (Black 2) & Butylene Glycol Cocoate & Polymethyl Methacrylate

Properties

- Non-Nano issues- average particle size range of ~ 20µm
- Deep and intense black color
- No agglomerates
- Less clumping, less beading and less buildup
- Better formulation stability
- Reduced dusting problems
- Can withstand high temperature and high sheer homogenization
